

Design & Completions

EU OPERATOR

ALTEA successfully arranged the refurbishment of a 15-year-old Embraer 135 from commercial to corporate shuttle configuration for a French based charter operator. Intelligent and effective, ALTEA's project management and creative – yet technical – capability allowed us to handle both the refurbishment (interior and exterior) and the maintenance oversight on behalf of the customer.

Design & Completions

From aircraft purchase to re-delivery in just 5 months

- ALTEA utilised its network of suppliers and specialists to refurbish this aircraft
- ALTEA closely monitored the aircraft transition for a successful hand-over to the customer

Design & Completions

- Interior and exterior design
- Technical oversight
- Customer representation

The ALTEA team monitors financial, commercial, technical and regulatory matters to make every project a smooth and productive experience.

THE ALTEA difference

Our major achievements on this project

- Complete project management, technical and commercial oversight
- Project completion within 5 months in challenging conditions post COVID
- Supplier management and negotiation for budget control
- In-house design
