The State of the Netherlands – PH-GOV

ALTEA successfully managed the nose-to-tail acquisition and outfitting of the new governmental aircraft for the State of the Netherlands - a Boeing BBJ bearing the registration PH-GOV. The aircraft was delivered after a 12-month completion at Fokker Techniek. ALTEA supported the customer from the outset through to delivery.
Over a four year period:

› ALTEA was the incumbent advisor to the State of the Netherlands for the procurement of the aircraft, acquired through a European tender that ALTEA co-authored. Among others, ALTEA played a pivotal role in conducting due diligence.
ALTEA was then responsible for the interior & exterior design of the aircraft and customer representation of its outfitting by Fokker Techniek.

ALTEA also advised the State of the Netherlands in preparing the entry into service of PH-GOV.

The ALTEA team took care of commercial, technical and regulatory matters, to make this project a smooth and productive experience.
**Major milestones**

- Request for Proposal via EU Tender: July 2016
- Contract Award: April 2017
- Aircraft production oversight: February – March 2018
- Aircraft completion & delivery: May 2018 - June 2019
THE ALTEA difference
Our major achievements on this project

- Aircraft delivered on time and on budget
- Interior design / VIP completion winner at the International yacht & aviation awards 2020

140 years’ collective completion experience
27 VIP completions

Aircraft worth $1.1 billion acquired/sold/leased

Award winning design
